01

Brand Overview

Fuzion Webz is a boutique web design studio founded by Roei Yehezkel and Elad Nissim. We build advanced, conversion-focused websites with a young, playful, and bold visual identity.

Our brand speaks through 2D vector art, kinetic typography, vibrant color contrasts, and fluid animations. We don't do 3D — we own the flat plane with confidence and energy.

Brand Personality:

Bold — We make statements, not whispers

Playful — Design should feel alive and fun

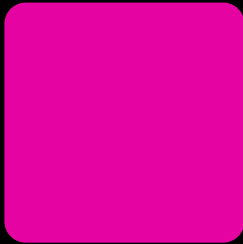

Sharp — Clean execution, no visual clutter

Young — Fresh, current, never corporate

Professional — Fun with substance behind it

02

Color Palette

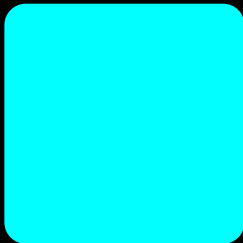

Electric Pink

PRIMARY

#E503A2 R:229 G:3 B:162

Use: CTAs, highlights, accents

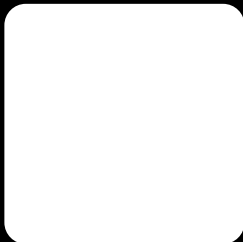

Neon Cyan

SECONDARY

#01FFFF R:1 G:255 B:255

Use: Hovers, links, glow effects

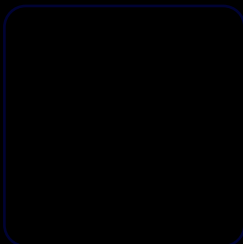

Pure White

NEUTRAL

#FFFFFF R:255 G:255 B:255

Use: Text on dark backgrounds

Deep Black

BASE

#000000 R:0 G:0 B:0

Use: All backgrounds, depth

Usage Ratios

03

Typography

SINGLE FONT SYSTEM

Anomalia

Custom font by Fuzion Webz | THE ONLY FONT USED ACROSS ALL TOUCHPOINTS

Aa Bb Cc Dd Ee
Ff Gg Hh Ii Jj Kk

TYPE SCALE

64-120px **Hero**

42-56px **Section**

24-32px **Card Title**

16-18px **Body**

12-14px **Caption**

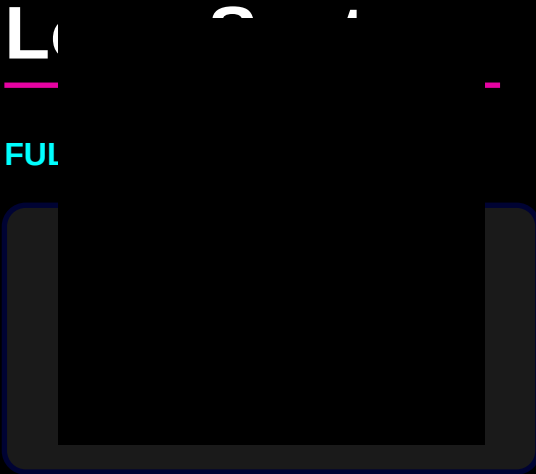

IMPORTANT

Anomalia is used for EVERYTHING: headlines, body, navigation, buttons, captions, forms, and all UI text.

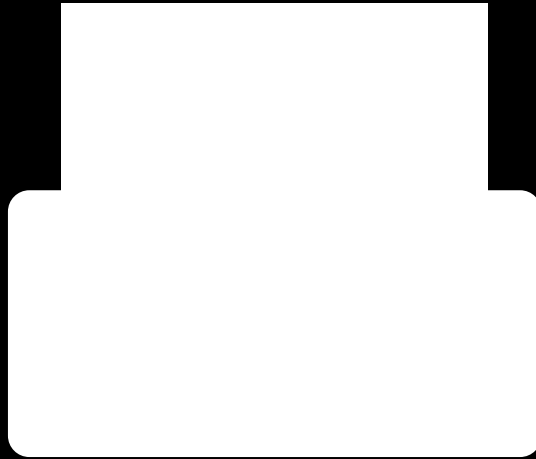

No secondary font. No fallback font in designs.

Web fallback stack: Anomalia, system-ui, sans-serif

Black

CLEAR SPACE & SIZING

Minimum clear space: equal to the height of the 'F' in the logo

Minimum logo width: 120px digital / 30mm print

Minimum icon width: 32px digital / 10mm print

LOGO DON'TS

- ✗ Do not stretch or distort
- ✗ Do not change brand colors
- ✗ Do not add shadows or 3D effects
- ✗ Do not place on busy backgrounds
- ✗ Do not rotate
- ✗ Do not use below minimum size

05

Design Principles

BOLD CONTRAST

Black backgrounds with electric pink and cyan accents. High contrast creates visual impact. Every element should feel intentional and punchy.

2D VECTOR ONLY

No 3D renders, no photorealistic effects. Our visual world is flat, vector-based, and illustrative. Think stickers, not sculptures.

KINETIC TYPOGRAPHY

Text is alive. Headlines scale, rotate, and transform on scroll. Words become design elements, not just content carriers.

GENEROUS WHITESPACE

Despite bold colors, breathing room is essential. Let elements float in space. Dense does not mean impactful.

PLAYFUL PRECISION

Every animation, every micro-interaction is deliberate. Playful does not mean random — it means carefully crafted joy.

06

Web Design Language

LAYOUT

- Full-viewport sections with scroll-triggered transitions
- Asymmetric grids that break conventional alignment
- Oversized Anomalia typography as hero elements
- Horizontal scroll sections for portfolio showcase
- Sticky nav with reveal/hide on scroll direction

COMPONENTS

- Custom cursor — shape-shifts on interactive elements
- Magnetic buttons — elements attract cursor on proximity
- Reveal cards — content appears with staggered animations
- Marquee text — infinite horizontal scroll banners
- Floating CTA — persistent WhatsApp/contact button

VISUAL ELEMENTS

- Vector illustrations — flat, colorful, character-based
- Geometric shapes — circles, lines as decorative accents
- Gradient overlays — pink-to-cyan on hover states
- Grain/noise texture — subtle on dark backgrounds
- SVG line art animations — icons draw in on scroll

07

Animation & Interaction

PAGE TRANSITIONS

Smooth full-screen wipe. Black to content reveal with staggered element entry. Duration: 600-800ms, ease: cubic-bezier(0.76, 0, 0.24, 1)

SCROLL ANIMATIONS

Elements enter with fade-up + slight scale. Parallax layers at different speeds. Text reveals word-by-word or letter-by-letter.

HOVER EFFECTS

Buttons: bg fills from center, text inverts. Cards: lift + shadow + glow. Images: scale 1.05 + color overlay. Links: underline draws left to right.

CURSOR

Default: 12px white circle. Links: 48px + blend mode. Images: 'View' label. Drag areas: directional arrows. CTA: pink pulsing ring.

MICRO-INTERACTIONS

Form labels float on focus. Loading: pulsing pink dots. Success: Lottie checkmark. Scroll indicator: bouncing arrow.

PERFORMANCE

Animate only transform & opacity. Respect prefers-reduced-motion. Max 3 concurrent animations per viewport. Lazy-load below fold.

08

Do's & Don'ts

DO

- ✓ Use black as the dominant background
- ✓ Pair pink and cyan for maximum energy
- ✓ Use oversized Anomalia typography for headlines
- ✓ Add micro-interactions to every interactive element
- ✓ Keep animations smooth, fast, and purposeful
- ✓ Use vector illustrations and flat design
- ✓ Maintain generous spacing between sections
- ✓ Design mobile-first with touch-friendly interactions
- ✓ Use Anomalia as the ONLY font everywhere

DON'T

- ✗ Use 3D renders, photorealistic textures, or skeuomorphism
- ✗ Use stock photos as hero backgrounds
- ✗ Use any font other than Anomalia
- ✗ Create animations longer than 1 second for UI feedback
- ✗ Use light/white backgrounds for main sections
- ✗ Overcrowd layouts — negative space is a feature
- ✗ Ignore accessibility — contrast must meet WCAG AA
- ✗ Use generic UI kits — everything should feel custom
